This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

No. 1. SERIES 1900-1901.

# MONTHLY SUMMARY

OF

# COMMERCE OF THE ISLAND OF CUBA.

JULY, 1900.

PREPARED IN

DIVISION OF INSULAR AFFAIRS,
WAR DEPARTMENT.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1901.

# EXPLANATION OF REGULAR STATISTICAL TABLES.

*General imports.*—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of general imports, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse.

The term "entry for consumption" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported are governed by the regulations in force, approved May 1, 1899, which prescribe that the values of imported merchandise subject to duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation in the principal markets of the country whence imported, and in the condition in which such merchandise is there bought for exportation or consigned for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment."

*Domestic exports.*—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the island whence they are exported.

*Tonnage tables.*—In the tables of tonnage movement the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

*Weights.*—In all tables published the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

*Customs districts.*—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry.

# NOTES.

## THE SUGAR INDUSTRY.

[Gabriel Camps in September, 1900, Review of Agriculture.]

The damages caused to our great industry by the war have been greatly exaggerated. Without doubt the diminution of the crops and the paralysis of all work at many plantations have ruined their owners, just as a frost leaves in misery the orange growers or the grasshoppers or phylloxera other agriculturists. But the industry in its essentials is as powerful as ever, demonstrated by the announcement that the coming year we will make 500,000 tons, and the certainty, conceded by everyone, that inside three years our ports will again export the famous million tons of 1893. From the economic point of view, the burning of the mills as a strategic military measure, effected with neither system nor concert—if it produced military results, we have not known it—resulted a benefit to the country, admitted that there existed an enormous disproportion between the industrial facilities of the country and its agricultural means. We had excess of machinery and were short of cane. It might be affirmed that the majority of the mills did not elaborate 50 per cent of their productive capacity and none reached its maximum to our knowledge. Confining ourselves to the mills situated near the three railways Villanueva, Western, and Bahia, an example that might extend to all the rest, and where the damages were most intense, we see that the mills existing and in activity to-day are more than sufficient to grind all the cane that was harvested in their radii before the war. In the rest have disappeared San Antonio, Panalver, and other mills, but remain those of Fajardo, Pilar, and Fortuna, that have capacity to grind the cane produced by the other plantations as well as their own. The Pelayo, Averhoff, and Fernandez de Castro mills in Bahia can grind their own cane as well as that of the destroyed mills, Ulacia, Gonzalez, and Casanove, and with very little effort can take care of all the cane that can be produced from here to Matanzas on that side. At Villanueva, where the destruction was greatest, it is the same. San Augustin, Mi Rosa, San Jose, Teresa, Luisa, Gia, Herculano, Armonia, San Francisco, Alianza, Lima, Santa Rosa, Carmen, and others, all burned, are not necessary, as there remain Toledo, Julia, Providencia, Nombre de Dios, Armistad, Josefita, San Rafael, Jobo, Veresa, Canos, and Conchita, and we might arrive at 1,000,000 tons, and these mills would yet lack raw material to their capacity. If we direct ourselves to other districts of the islands we will find the same.

On all hands is seen the effects of the craze for the acquisition of machinery, and had we directed the efforts made in this direction to the agricultural progress of the country we should now be in its full enjoyment.

Cuba is now in possession of all her instruments of production, and undoubtedly in a short time will again reach her former position as the foremost producer of cane sugar in the world, with the advantage that her planters, well taught in the school of adversity, will obtain the maximum production with the major economy, the practice of which, fortunately, has begun in all parts. With a certain consumers' market like the United States, especially the Eastern States, cost of production cheapened, the establishment of new industries in the country, lesser freights—now that it is probable that we will need to order nothing from Europe, a reduction of our transportation facilities—the introduction of mules and light carts has been an object lesson that we owe to the interventors—the new plows, the central railway with branches to both coasts, and highways, certain to be, though possibly delayed more or less—with all this we say that the elaboration of sugar will be done under better conditions of convenience, economy, and profit.

We have no foreign competition, and only a hostile tariff can endanger our industry—a possibility that only finds place in the heads of professional politicians, envoys of misery and disaster. And we fear not, for the laws of nature are immutable and nature aids us. To the fertility of our soil we must add our climate and our geographical position—the two Americas on one side and Europe on the other. Here we have a perpetual spring—at times more humid than at others—to distinguish which we call from November to May winter, and the rest summer. Think of the economy that this supposes in heat, clothing, food, and the numerous needs that atmospheric changes carry with them, and we are convinced that this item must be placed to our credit. Feeding live stock, an important matter in other parts, here is exceedingly cheap. No stables are needed, though for collection of compost, etc., they are a convenience. We know not the diseases common to live stock in other parts, and any pasture is an abundant storehouse of free forage.

At the present and for some time to come we may enjoy the boon of low rents. With the rental that one hectare costs in any country in Europe one may enjoy here an hundred hectares, and when we remember that there is no plantation distant ten miles from the sea or a railway station we are satisfied that the long and narrow form of the island is a blessing.

What we lack is a little diligence and less pessimism. For us pessimism is an obsession. We were pessimists in the time of slavery, when sugar was a dollar—we are in this moment, when there dawns an unexampled cycle of credit, and, unless God wills otherwise, pessimists we will continue to be to the end of time. We want everything done for us, and ignorance is the close-pressed veil that covers many faces. A friend has said to us that more has been written and more is known of Cuba in the last two years than in the four hundred before; and representative men, who owe to sugar all that they are and all that they have, know as much of these matters as of the Antipodes. They fly from every enterprise that is not absolutely certain, and when a foreigner, brighter and quicker, brings to success a rich enterprise whose future is evident they lament in such phrases as "Poor Cuba!" "Absorption!" etc., without thinking that they make their ignorance patent and that they are more interested in keeping their pockets well closed than in all this talk of "country," "language," "race," etc., that from their lips is mere drivel.

Let us be optimists and get to work.

*Comparative statement of the movement of sugar, Habana, for the period from January 1 to November 30, during the years 1898, 1899, and 1900, respectively.*

## CROPS IN CUBA.

[From the Habana Post, November 15, 1900.]

The last weekly report of the Cuban weather bureau, division of the United States Department of Agriculture, shows crops throughout the island to be in good condition. The report follows:

*Tobacco.*—In Pinar del Rio and Habana province tobacco transplanting continued throughout the week under generally very favorable conditions. This work at the close of the week was drawing to a close in the vicinity of Pinar del Rio city and weeding of the early crop had commenced. In the vicinity of Guanajay the transplanted crop was somewhat injured by dry weather, and in the vicinity of San Felipe the work of transplanting was performed with some difficulty, due to the deficiency of rainfall. Both from Cruces and Santa Clara we receive reports to the effect that transplanting continues, and it is expected that a very large crop, possibly larger than last year's, will be put in if the weather conditions continue favorable. Transplanting also continued in eastern Santa Clara. A good rain would now be beneficial to all transplanted tobacco in that province. In southwestern Puerto Principe the crop was in urgent need of showers, but in the northwestern section of the province the weather of the week had been exceptionally favorable. Young plants are abundant in all the tobacco districts. Some setting is still under way at Guanajay.

*Cane.*—The cane crop, as a rule, is reported in a very satisfactory and encouraging condition throughout the sugar districts. The cool weather of the week was exceptionally opportune for the mature cane; however, at a number of points canes have not attained their full growth, and consequently they need more rain. The lack of rain in Habana, Matanzas, and Santa Clara provinces has not, with a few exceptions, materially retarded the growing crop. It is generally in a luxuriant condition, but stands very much in the need of the stimulus that a good rain would impart. This applies especially to the very recent plantings and replantings, notably in the vicinity of Banaguises.

Cleaning cane was actively carried forward in Santa Clara province and in northern Santiago de Cuba. Planting, replanting, and the preparation of ground received considerable attention, except in the greater part of Matanzas province, where the dry weather interfered with such operations. A large number of plantations throughout the various districts took advantage of the dry weather of the week to prepare for grinding. The concensus of opinion appears to be that the next grinding will produce a good yield.

*Small crops, etc.*—Small crops look well everywhere and are reported abundant. They are receiving considerable attention generally throughout the island, and the reports indicate that larger areas are being cultivated. Bananas are in a satisfactory condition. Coffee picking has begun in the Yateras district. Labor is reported scarce in Pinar del Rio and in the neighborhood of Santa Clara, but plentiful in the vicinity of Congojas, Santa Clara province.

[NOTE.—Beginning July 1, 1900, the statistical reports to the Division of Insular Affairs were based upon a new schedule, giving the classification of commodities imported and exported much more in detail than were required by the schedule in effect prior to that date. Owing to this change it is impossible to make comparison by articles and countries in some instances.]

# EXPLANATION OF REGULAR STATISTICAL TABLES.

*General imports.*—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of general imports, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse.

The term "entry for consumption" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported are governed by the regulations in force, approved May 1, 1899, which prescribe that the values of imported merchandise subject to duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation in the principal markets of the country whence imported, and in the condition in which such merchandise is there bought for exportation or consigned for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment."

*Domestic exports.*—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the island whence they are exported.

*Tonnage tables.*—In the tables of tonnage movement the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

*Weights.*—In all tables published the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

*Customs districts.*—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry.

# CONTENTS.

| | Page. |
|---|---|
| Summary | 73 |
| Imports and exports, by countries | 74 |
| Imports and exports, by customs districts | 74 |
| Imports of gold and silver | 76 |
| Exports of gold and silver | 76 |
| Imports in detail | 77 |
| Exports in detail | 125 |
| Vessels doing carrying trade | 134 |
| Passenger statement, Habana, fiscal year ended June 30, 1900 | 136 |
| Immigration statement, Habana, fiscal year ended June 30, 1900 | 136 |
| Statement of exportation of tobacco from the port of Habana, Cuba, during the year 1899 | 137 |
| Sugar production of Cuba, crop 1899–1900 | 138 |

[NOTE.—Beginning July 1, 1900, the statistical reports to the Division of Insular Affairs were based upon a new schedule, giving the classification of commodities imported and exported much more in detail than were required by the schedule in effect prior to that date. Owing to this change it is impossible to make comparison by articles and countries in some instances.]

# EXPLANATION OF REGULAR STATISTICAL TABLES.

*General imports.*—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of general imports, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse.

The term "entry for consumption" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported are governed by the regulations in force, approved May 1, 1899, which prescribe that the values of imported merchandise subject to duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation in the principal markets of the country whence imported, and in the condition in which such merchandise is there bought for exportation or consigned for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment."

*Domestic exports.*—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the island whence they are exported.

*Tonnage tables.*—In the tables of tonnage movement the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

*Weights.*—In all tables published the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

*Customs districts.*—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry.

| Received up to February 28 at ports | ..... | 8,606 | ..... | 523 |
| Total | ..... | 116,056 | ..... | 260,509 |

NOTE.—Sacks contain 320 pounds; ton contains 2,240 pounds.

[NOTE.—Beginning July 1, 1900, the statistical reports to the Division of Insular Affairs were based upon a new schedule, giving the classification of commodities imported and exported much more in detail than were required by the schedule in effect prior to that date. Owing to this change it is impossible to make comparison by articles and countries in some instances.]
